

Standard price list **Batribox** **2025**

Standard price list

Applicable at 1st January 2025

SECONDARY BATTERIES / ACCUMULATORS	Fees in Euros per kilo (excl. Taxes)
Secondary Lithium batteries (*)	0.453
Nickel Metal Hydrure (Ni-MH) (**)	0.181
Secondary Batteries Nickel Metal Hydrure (Ni-MH) ≥ 30gr	0.201
Lead	0.560
Nickel-Cadmium (Ni-Cd)	1.000
Secondary Sodium-Ion	0.260
Secondary button cell Lithium	2.500

(*) Secondary Lithium batteries with Cobalt

(**) Cylindrical < 30gr only

PRIMARY BATTERIES	Contribution en euros ht par kilo
Alkaline	0.402
Zinc Carbon	0.804
Primary Lithium (Cylindrical) <30gr.	2.561
Button Cell (alkaline, lithium, silver oxyde, zinc air...)	3.700
Zinc Air	0.440
Button cell Primary batteries Bio-Enzymatic	0.200

The annual contribution for any declaration may not be less than **€200** excluding VAT. A flat-rate fee of **€200** excluding VAT will be charged for any zero declaration. Registered members who have not made a declaration will be charged the minimum flat fee of **€200** excluding VAT.

Simplified price list 2025

ELIGIBILITY REQUIREMENTS FOR THIS SCAL:

QUANTITY

of primary and/or secondary batteries
placed on the market in a year

< 10,000 Units

WEIGHT

of each primary and/or secondary
batteries strictly

< 1kg

FEE SCHEDULE: 0.30€ HT excl. taxes / unit

The annual contribution for any declaration may not be less than **€200** excluding VAT. A flat-rate fee of **€200** excluding VAT will be charged for any zero declaration. Registered members who have not made a declaration will be charged the minimum flat fee of **€200** excluding VAT.

Price list 2025

Bonus - Malus

Malus

ECO – MODULATION	Contribution in euros excl. taxes per kilo
Secondary Lithium batteries without Cobalt	0.470

SECONDARY LITHIUM BATTERIES WITHOUT COBALT

Different families of lithium batteries coexist.

The families of cobalt-free lithium batteries (LMO, LFP), having an economic and environmental impact, as well as a shorter lifespan compared to those based on cobalt (LCO, NCA, NMC), oblige Batribox to apply a penalty to them.

Bonus

ECO – MODULATION	Contribution in euros excl. taxes per kilo
Nickel metal hydride (Ni-MH) cylindrical	0.181

SECONDARY BATTERIES NICKEL METAL HYDRIDE (Ni-MH) < 30gr () Cylindrical < 30gr only**

Nickel-Metal Hydride (NiMH) stick-format batteries (weighing less than 30g) can be used as replacements for alkaline batteries of the same format. When used under similar conditions, these batteries have a lower environmental impact.

Exemple of contributions

Alkalines: 0.402€ / kg

Type	Average weight (g)	Contrib. 1 battery (€)	Contrib. 100 battery (€)
LR 03	11.2	0.0045	0.45
LR 6	23.2	0.0093	0.93
LR 14	66.1	0.0266	2.66
LR 20	139.8	0.0562	5.62
6 LR 61	46.2	0.0186	1.86
3 LR 12	157	0.0631	6.31
GP 23	7.5	0.0030	0.30
4 LR 44	10.7	0.0043	0.43

Zinc carbon: 0.804€ / kg

Type	Average weight (g)	Contrib. 1 battery (€)	Contrib. 100 battery (€)
R 03	9.1	0.0073	0.73
R 6	20.7	0.0166	1.66
R 14	46.4	0.0373	3.73
